COLDLINE WIND FREEZER CABINET - lt. 900

SOLUZIONI FOODSERVICE

CHARACTERISTICS:

Dimensions mm. 810×1015 H2085

SUITABLE FOR INSERTING 600x800 MM GRILLES

- External/internal AISI 304 stainless steel
- Insulation thickness 75 mm
- Reversible doors with 105° stop. AISI 304 stainless steel handle
- Lock with key and standard lighting
- Tropicalized condensing unit + 43°C
- Ventilated refrigeration and high efficiency air flow diffuser
- Cataphoresis treated evaporator
- Automatic hot gas defrost and automatic condensate evaporation

Wide range with R290 gas.

Three ranges available -5°+10°C, -10°-22°C, -10°-30°C which satisfy all needs and integrate perfectly with the preventive blast chilling or freezing with the MODI blast chiller.

Capacity: 25 or 50 EN60x40 trays.

The height of the internal shelves is adjustable according to a wide range of positions to better organize the arrangement of the products and always have them at hand.

WIND conservators are equipped with R290 natural gas which guarantees superior efficiency compared to traditional refrigerant gases. The result is an immediate economic advantage and an extremely reduced environmental impact.
