WORKTOP WITH RISER

TEMP. -2/+8°C

- External/internal AISI 304 stainless steel
- Insulation thickness mm. 60
- PVC handle
- AISI 304 stainless steel racks and guides with GN1/1 rilsan grids
- Tropicalized condensing unit
- Ventilated refrigeration
- Electronic thermostat
- Evaporator treated by cataphoresis
- Automatic hot gas defrost
- Automatic condensate evaporation
- Energy efficiency class A

SMART refrigerated tables, thanks to reduced consumption and preservation quality, are suitable for both small bistro kitchens and large cooking centres. Temperature range -2°+8°C to preserve fresh and semi-finished foods.

The SMART body made with high thickness steel is robust and resistant, made to last over time and be a certainty in daily work.

The worktop is reinforced with rounded front and rear edges for perfect cleaning. The splashback is closed at the rear to avoid accumulations of dirt.

The fully extractable drawers have a high capacity, are designed to be interchangeable even on site and adapt to any new future needs. Internal heights: 1/3=150 mm - 1/2=205 mm - 2/3=310 mm.
