

ELECTRIC COAL LIGHTER 2000W temperature 650°

SOLUZIONI FOODSERVICE

Light electric charcoal.

The fastest and safest way to light your barbecue.

The superhot air (II: 650°C) easily ignites your outside and within 60 seconds the coal, and then ventilates them (I: 60°C)

No lighter fluid, no butane, no CO2 emissions.

Excellent for charcoal, hearths, stoves, wood and fireplaces

Guaranteed even in the windiest conditions.
