SOLUZIONI FOODSERVICE

CHARACTERISTICS:

- made entirely of Aisi 304 - 18/10 stainless steel
- square tubular structure cm. 2.5x2.5 TIG welded
- stainless steel worktops welded to the structure equipped with an anti-vibration panel
- load capacity of the shelves kg. 80 each
- "Z" welded under-counter reinforcement frame in stainless steel tubing
- overall dimensions cm. 100x56.5 H94
- wheels diameter cm. 12.5, fixed with a stainless steel square welded to the structure, high performance in anti-corrosion material, excellent smoothness and silence, made with a polypropylene core and non-marking gray synthetic rubber tread, polyamide structure and swiveling on a double row of stainless steel balls, hub heavy hole.

Ideal for large kitchens, canteens, supermarkets, butchers and other public and gastronomic facilities but also in the private sector; They offer plenty of space to carry dishes and drinks. Thanks to the careful workmanship and the stainless steel with which it is produced, the trolley is extremely easy to clean and maintain.

Stable, self-supporting and hygienic construction in TIG welded tubular, spontaneous fusion welding process which guarantees high quality and excellent aesthetic result.

Tops WELDED to the side uprights, obtained by moulding, with a shaped and raised edge of 10 mm along the entire perimeter. The edge is also folded downwards and riveted towards the inside of the top for safety and hygiene reasons. The shape of the drawing is characterized by large radiuses and has no corners that are inaccessible to cleaning.

Trolley equipped with 4 high-performance swivel wheels in anti-corrosion material, excellent smoothness and silence, made with a polypropylene core and non-marking gray synthetic rubber tread, polyamide support structure and swiveling on double row of stainless steel balls, through-hole hub, 2 with brake, easily replaceable, fixing with stainless steel bolt on a threaded support welded to the frame, protected by 4 round bumpers in resistant plastic material, mounted directly above the wheels. They can be replaced by dismantling the wheels themselves.
