GRILLED STAINLESS STEEL FOOD TROLLEY CM. 108X45X28/100H

GRATED FRAME ON 6 WHEELS FOR CASSETTES AND PRODUCTS

SOLUZIONI FOODSERVICE

CHARACTERISTICS:

- made entirely of Aisi 304 - 18/10 stainless steel
- double square tubular structure cm. 2x2, TIG welded
- stainless steel threaded block welded to the structure for fixing wheels
- 12.5 cm diameter wheels with anti-acid fibre-reinforced ABS supports screwed with stainless steel bolts
- payload kg. 300
- overall dimensions cm. 45x110 H110

Suitable for transporting boxes or foodstuffs.

Ideal for large kitchens, canteens, supermarkets, butchers and other public and gastronomic establishments.

Thanks to the careful workmanship and the stainless steel with which it is produced, the trolley is extremely easy to clean and maintain.

Stable, self-supporting and hygienic construction in TIG-welded square tubing, a spontaneous fusion welding process that guarantees high quality and excellent aesthetic results.

Trolley equipped with 6 high-performance wheels in anti-corrosion material, excellent smoothness and silence, made with a polypropylene core and non-marking gray synthetic rubber tread, polyamide support structure and swiveling on a double row of stainless steel balls, hub with through hole (4 external movable and 2 fixed central units), of which 2 with brake, fixing with INOX bolt on threaded INOX support welded to the frame.

Bumpers are not provided to avoid the accumulation of dirty material, thus ensuring easier cleaning.
