CHARACTERISTICS:

- made entirely of Aisi 304 - 18/10 stainless steel
- square tubular structure cm. 2.5x2.5 TIG welded
- stainless steel worktops welded to the structure
- load capacity of the shelves kg. 50 each
- useful distance between shelves cm. 38
- overall dimensions cm. 60x55 H61
- wheels diameter cm. 10 with acid-resistant fibre-reinforced ABS supports screwed with stainless steel bolts.

Ideal for large kitchens, canteens, supermarkets, butchers and other public and gastronomic facilities but also in the private sector; excellent support surface for transportable machinery. Thanks to the careful workmanship and the stainless steel with which it is produced, the trolley is extremely easy to clean and maintain.

Stable, self-supporting and hygienic construction in TIG welded tubular, spontaneous fusion welding process which guarantees high quality and excellent aesthetic result.

Shelves WELDED to the side uprights. The edge is also folded downwards and riveted towards the inside of the top for safety and hygiene reasons.

Trolley equipped with 4 high-performance swivel wheels in anti-corrosion material, excellent smoothness and silence, made with polypropylene core and non-marking gray synthetic rubber tread, polyamide support structure and swiveling on double row of stainless steel balls, through-hole hub, 2 with brake, easily replaceable, fixing with stainless steel bolt on a threaded support welded to the frame, protected by 4 round bumpers in resistant plastic material, mounted directly above the wheels. They can be replaced by dismantling the wheels themselves.
