

BONE CHINA SNOW PLATE 31 cm

SOLUZIONI FOODSERVICE

Neve owes its elegant purity to the simplicity and softness of its lines, in balance between the wide layers of plates and cups and the roundness of the assorted cafeteria.

The quality, transparency and thickness of the items help to enhance all culinary preparations.

Bone China is a type of porcelain used mainly for the production of plates and crockery, designed for both domestic and professional use (restaurants and hotels).

A bone china dinner service is usually used on important occasions or in medium-high level restaurants.

This type of dishes are also very resistant, because porcelain is very hard. Their resistance is often greater than that of ordinary porcelain dishes.
