

SPARE FIFO BOTTLES FOR ASEPT PUMP ml. 710

SOLUZIONI FOODSERVICE

Ideal solution for the efficient and hygienic distribution of condiments such as ketchup, mayonnaise, mustard and others.

- Bottom Dispensing Design FIFO Bottle:

The innovative design allows correct rotation of food according to the "First In, First Out" principle.

This means older condiments are dispensed first, ensuring freshness and reducing waste.

- Rapid Dispensing:

Thanks to gravity, the sauce is pushed towards the valve without the need to bang bottles on the counter.

This ensures fast and continuous delivery, improving efficiency and reducing customer waiting time.

- Waste reduction:

Bottom dispensing minimizes the amount of wasted condiment left in the bottle, helping to reduce operating costs and improve environmental sustainability.

- Easy to Clean:

The double openings allow simple and complete cleaning of the device, ensuring maximum hygiene and reducing the risk of cross-contamination.

- NSF certification:

The product is certified by NSF, ensuring compliance with the highest food safety standards and compliance with current regulations.

- Adaptability:

The system is highly adaptable and can be customized with a full range of FIFO Bottle components to meet specific customer needs. This allows you to create customized condiment dispensers, optimizing space organization and improving the customer experience.

In summary, the ASEPT Pump Replacement FIFO Bottles offer an effective solution for managing condiments in environments such as restaurants, fast food outlets, food outlets and more, ensuring freshness, hygiene and operational efficiency.
