SOLUZIONI FOODSERVICE

CHARACTERISTICS:

- made entirely of Aisi 304 stainless steel
- square tubular structure cm. 2.5x2.5 TIG welded
- stainless steel side paneling
- stainless steel threaded block welded to the structure for fixing wheels
- wheels diameter mm. 125 with acid-resistant fibre-reinforced ABS supports screwed with stainless steel bolts
- payload kg. 100
- overall dimensions cm. 46.5x55 H150.5

Suitable for transporting trays measuring cm. 53x32 and cm. 53x39; up to a maximum of 11 pieces at the same time.

Ideal for large kitchens, canteens, supermarkets, butchers and other public and gastronomic facilities. Thanks to the careful workmanship and the stainless steel with which it is produced, the trolley is extremely easy to clean and maintain.

Stable, self-supporting and hygienic construction in TIG-welded square tubing, a spontaneous fusion welding process that guarantees high quality and excellent aesthetic results.

The structure of the tray holder guides is made of a cm-thick shaped steel wire. 0.5 with a gap of cm. 10

Trolley equipped with 4 large swivel wheels, 2 of which with brakes.

Paneled on the side and with a practical and comfortable tray with handles for carrying glasses.
