MARCA: RATIONAL

SOLUZIONI FOODSERVICE

The package includes six cartridges of Active Green detergent, specially formulated for use in Rational iCombi Pro ovens equipped with the AutoDose option. This cleaner is designed to provide effective and environmentally friendly cleaning.

iCareSystem AutoDose: Autonomous washing system designed specifically for Rational iCombi Pro ovens (excluding 20 tray models). This system allows for completely autonomous and programmable washing, ensuring maximum convenience and operational flexibility.

Programmability: Each wash can be started according to a pre-established program, ensuring optimal cleaning based on the user's specific needs.

Optimized Dose: The AutoDose system takes exactly the necessary dose of detergent from the integrated cartridges, ensuring efficient use of the product and consistent cleaning results.

Safety at Work: Thanks to the programmability and autonomy of the system, iCareSystem AutoDose helps to guarantee a safer working environment for operators.

Time Saving: Automating the washing process saves valuable time, allowing operators to focus on other critical tasks.

Compliance with HACCP Standards: The iCareSystem AutoDose system contributes to compliance with the standards of the HACCP system, guaranteeing maximum hygiene and food safety.

Maximum Cleaning Power: The Active Green detergent formula offers powerful cleaning, effectively removing grease residues, encrustations and other difficult deposits.

Ecological Formula: Active Green detergent is formulated with ecological ingredients, reducing the environmental impact without compromising cleaning effectiveness.
