

**PRO-DIAMOND SENO&SENO HIGH FLARED NON-STICK PAN
IN ALUMINUM cm. 32X7.5**

SOLUZIONI FOODSERVICE

The SENO&SENO flared high non-stick pan by Pro-Diamond represents excellence in modern cooking, combining innovation and high-level performance. Made with a high-quality aluminum body, this pan offers even heat distribution for flawless culinary results.

Its 4 mm thick base ensures optimal stability on the hob, guaranteeing uniform and efficient cooking. Thanks to Pro-Diamond non-stick technology, this pan allows you to cook without the addition of excess oil or fat, allowing for healthier and lighter preparation of your favorite dishes.

The pan is designed to be versatile and suitable for different heat sources, including induction, thanks to its special base. This makes it an ideal choice for a wide range of modern kitchens. Furthermore, the X-Fusion external coating gives the pan exceptional resistance to high temperatures, ensuring long-lasting durability and performance.

To ensure optimal performance over time, we recommend following some simple instructions for use and care. Before using, it is advisable to wash the pan with soap and water and precondition the interior with a light coating of oil. It is important to avoid overheating the empty pan and to use moderate heat when cooking. Furthermore, it is recommended to use gloves or protection when handling the hot pan and to avoid using abrasive products when cleaning.

TECHNICAL FEATURES

Composition:

- Top coating, provides excellent non-stick.
- Intermediate coating, ULTRA REINFORCED WITH synthetic DIAMONDS to increase resistance to scratches and abrasions.
- Primer coating, ultra reinforced with mineral particles, for maximum adhesion.
- Forged aluminum (98% purity) high thickness, for greater stability and longer life.
- THERMORADIANTE ® anti-deformation stainless steel.
- High temperature resistant X-FUSION external coating.
- Suitable for food contact
