

SCISSORS FOR FORGED STAINLESS STEEL CAKE cm.25

SOLUZIONI FOODSERVICE

The pliers are one of the historic items of piazza production.

Some of them have become "classics" so much so that they have been present in the catalog since the early 60s with the same design as today's ones, reflecting the particular attention paid to the functionality of our products, a feature that distinguishes us from always.

Even today, as then, they are entirely produced in Italy, with the utmost care in their construction and assembly in order to make them almost indestructible.
