MARCA: GI.METAL

SOLUZIONI FOODSERVICE

Evolution shovel, SHA (Special Hard Anodizing) aluminum head and aviation-colored anodized handle.

The special SHA treatment is a hard oxide anodization that guarantees maximum protection against corrosion, wear and friction, while ensuring extreme smoothness and the same lightness as the timeless Azzurra.

The new perforation ensures the flour is discharged in both directions, guaranteeing an unrivalled result.

Advantages:

New optimized flour discharge drilling

3 times more heat resistant than anodized aluminum

Durability High resistance to corrosion, scratches and wear

Smoothness Very low friction coefficient
