# SOLUZIONI FOODSERVICE

Low speed extractor designed for cold extraction of juices from fruit and vegetables, ideal for preserving maximum vitamins and nutrients.

## Main Features:

- External Structure: Made of high quality stainless steel, durable and easy to clean, ensuring a long product life.
- Feed Hopper: Special design for easy loading of large pieces of fruit and vegetables, reducing preparation time.
- High Efficiency Auger: Designed to ensure optimal juice extraction, maximizing yield and minimizing waste.
- Drip Saver Cap: Keeps the work surface clean, avoiding unwanted drips during and after extraction.
- Easy to Disassemble: The parts involved in the extraction process can be quickly disassembled for quick and easy cleaning.
- Pestle Included: Allows you to easily push the food towards the auger, ensuring a constant flow during extraction.
- Cleaning Accessories: A dedicated brush to precisely clean all parts of the extractor.
- Standard trays: Includes a tray to collect the waste and one for the extracted juice, ready to use.
- Interchangeable Baskets: Supplied with 3 baskets with different perforations to adapt to different extraction needs.
- Powerful Motor: Equipped with a ventilated asynchronous motor, featuring gear reduction for quiet and long-lasting operation.

This extractor is the ideal choice for those looking for a robust, versatile and easy-to-use product, capable of guaranteeing fresh and nutritious juices every day.
