CODICE: 0720017470086

SOLUZIONI FOODSERVICE

Made from high quality cast iron, this burner stove is designed for strength and durability.

The stove is powered by LPG (liquid propane gas), ideal for use in domestic or outdoor environments, such as camping or outdoor kitchens.

Equipped with a thermocouple safety system, which automatically cuts off the gas flow in the event of accidental flame extinguishing. This ensures safe use of the product, preventing dangerous gas leaks.

The burner is equipped with a pilot flame that facilitates quick and safe ignition, keeping the burner always ready for use.

Compact and easily transportable, suitable for mounting on various types of cooking surfaces. The low weight allows for quick and easy installation.

Perfect for cooking at home, in restaurants or for outdoor activities, thanks to its robustness and reliability. Ideal for those looking for a powerful, safe and durable stove.

Dimensions: 390x585 mm. H180

Weight: 6 Kg
