

TESTO THERMOMETER mod. 104-IR Bluetooth WITH RETRACTABLE PROBE AND INFRARED -50° to +250°C

TESTO MOD. 104-IR BLUETOOTH THERMOMETER WITH RETRACTABLE PROBE AND INFRARED -50° to +250°C

The testo 104-IR Bluetooth thermometer is a professional instrument for measuring both surface and core temperatures, ideal for quality control and HACCP compliance. Thanks to its dual measurement technology with a retractable probe and infrared sensor, this device is extremely versatile and reliable for everyday needs in fast-paced environments.

Technical Features

- Measuring range: -50°C to +250°C
- Dual Function Technology:
 - Retractable Probe: To measure the internal temperature of foods or liquids precisely.
 - Infrared Sensor: To quickly measure surface temperature without contact, ensuring fast and efficient response.
- Integrated Bluetooth: Enables connection to the testo Smart App, offering digital management and documentation of measurement data in real time.

Advantages:

- Intuitive and Precise Measurements: This instrument combines penetration and infrared measurements in one device, making it easy to quickly and accurately check temperature.
- Support for the testo Smart App: The App guides the user through the measurement processes, with particular attention to the critical control points (CP/CCP), ensuring accurate and easy-to-manage monitoring and documentation.
- Error-Free Documentation: With the Bluetooth connection, measurement data can be automatically transferred to the testo Smart App, avoiding manual errors and ensuring traceability of measurements for regulatory compliance and quality assurance.
- Limit Value Monitoring: The app allows for quick and easy monitoring of temperature limit values, simplifying compliance with HACCP requirements and improving efficiency in control processes.
- Compact and Durable Design: The thermometer is designed to withstand daily use, with a retractable probe that protects the instrument when not in use, making it easy to carry and handle.

Applications:

- Ideal for HACCP controls in food, catering, restaurants and other industries where temperature monitoring is essential.
- Perfect for quick measurements of surface and internal temperatures in industrial kitchens, supermarkets and food production processes.

The Testo 104-IR Bluetooth thermometer is an innovative and versatile measuring instrument, perfect for anyone looking for efficiency, precision and easy, error-free documentation, with optimal integration with the Testo Smart App for digital management of measurement data.
