

EXPERT SERIES CUBING DISC KIT mm. 10x10x10 H

SOLUZIONI FOODSERVICE

The Expert Series Disc Dicing Kit mm. 10x10x10 H is designed to ensure precise dicing of fruit and vegetables, optimizing cutting operations and improving productivity in the kitchen. Made with stainless steel discs and featuring a special treatment that improves durability and performance, this kit is ideal for professional kitchens.

Main Features:

Dicing: Perfect for making uniform 10x10x10mm cubes, making it easy to prepare ingredients for salads, soups, sauces and other culinary preparations.

High Productivity: This kit allows you to produce up to 25 kg of ice cubes in just 4 minutes, offering significant time savings and improving operational efficiency.

Mineral Plus Treatment: The discs are treated with Surface Treatment Mineral Plus, a mineral-based treatment that guarantees optimal surface protection, reduces friction and improves smoothness during cutting, ensuring precise results and greater durability.

Materials and Durability:

Durable Stainless Steel: Made of high quality stainless steel, this kit ensures long life, corrosion resistance and consistent performance, even with heavy use.

Ease of Maintenance:

Dishwasher Safe: The Expert Series Dicing Disc Kit is easily dishwasher safe, making cleaning easy and ensuring the highest level of hygiene.

This kit is an indispensable tool for those who want to cut fruit and vegetables efficiently, saving time without compromising the quality of the final result. Ideal for professional kitchens and environments with intense work rhythms.
