

SINGLE HOLE CLINICAL LEVER MIXER WITH 200mm SPOUT

vedi prodotto online

SOLUZIONI FOODSERVICE

Designed for professional use, this single-lever mixer tap is ideal for environments that require practicality and resistance. The raised clinical lever, 300 mm long and made of glass-reinforced nylon, offers precise and easy control. It is equipped with stops for opening, closing and mixing, preventing an overload on the end of the cartridge stroke, thus ensuring greater durability.

The body of the tap is made of high quality chromed brass, with a sturdy and durable construction. The 200 mm swivel spout allows for greater flexibility, making it easier to use in different operating situations.

This raised single-hole faucet is perfect for those looking for a reliable product, with a design conceived to facilitate work and guarantee efficiency in every professional application.
