

STAINLESS STEEL HOSE REEL WITH 15M BARREL COMPLETE WITH GUN WITH SPRAY REGULATOR

Stainless Steel Faired Hose Reel With 15 Meter Barrel And Spray Gun With Regulator

SOLUZIONI FOODSERVICE

This stainless steel hose reel is the ideal solution for those looking for strength and practicality in irrigation or cleaning operations. Equipped with a 15-meter retractable hose, made of rubber certified for food use, and complete with gun with spray regulator, it offers high and reliable performance in environments where hygiene and resistance are required.

Main features:

- Food Grade Material: The retractable tube is made of black rubber certified for use with drinking water, ensuring safety and quality.
- Stainless steel construction (AISI 304): The casing and wall mount are made of durable stainless steel, ensuring long life and easy maintenance.
- Professional shower heads: For versatile use and professional quality.
- Tilting mechanism: Facilitates the extraction and rewinding of the hose, reducing wear and extending the useful life of the product.
- Elbow connection with non-return valve: Compliant with EN1717, the M1/2" threaded connection ensures a secure connection and prevents water backflow.
- Thermoplastic rollers: Present at the mouth, they reduce friction during use of the tube, improving the efficiency of the system.
- Spring tension adjustment: Allows you to control the hose rewinding speed, adapting to the user's needs.

Technical performance:

- Water pressure:
Max. 6 bar at 40°C (min. 2.5 bar)
Max. 4 bar at 60°C (min. 2.5 bar)
- Water temperature: Supports temperatures up to 60°C.
- Water flow rate:
8.5 l/min. with narrow jet (at 3 bar)
10.5 l/min. with jet at maximum width

This hose reel is perfect for use in industrial kitchens, food production facilities or anywhere where stringent hygiene standards and an efficient water management system are required.
