

**SHOWER GROUP H1200 WITH RAISED SINGLE-HOLE MIXER
FOR LARGE SYSTEMS**

vedi prodotto online

SOLUZIONI FOODSERVICE

This Single Hole Mixer Shower Group is designed to meet the needs of professional kitchens and restaurants. Made of chromed steel with a single hole outlet and wall fixing, the mixer is equipped with a single-control system with ceramic discs, ensuring a 180° rotation for the pre-wash set. The shock-proof technopolymer lever handle ensures a safe and resistant grip, while the polished stainless steel supports increase the durability of the product.

The diverter tap, with 90° rotation, offers the possibility of adjusting both the distance from the wall and the height of the shower. In addition, the orientable spout allows for versatile use. The design has been studied for simple installation and minimal maintenance, making it compliant with the standards required by the AUSL.

Technical features:

- Flexible viplato: 110 mm
- Support tube: 120 cm
- Black plastic lever: 23.7 cm
- Pipe length: 25cm
- Single-lever mixer with diverter for the shower group
- Made in Italy

Perfect for high-intensity use environments, it ensures reliability and durability over time.
