CODICE: H310A
MARCA: HUROM

SOLUZIONI FOODSERVICE

The Hurom H310A is the perfect juice extractor for those who have limited space but do not want to compromise on quality. Its compact and lightweight design makes it ideal for any modern kitchen, combining excellent performance and ease of use. Thanks to its advanced technology, the H310A guarantees optimal juicing, maintaining intact nutrients, vitamins and taste.

Main Features:

- Slow Extraction Technology: Squeezing occurs at low speed without generating heat, preserving the nutritional and organoleptic properties (flavor, aroma, color) of fruit and vegetables. The juice obtained can be stored for up to 48 hours in the refrigerator.
- Multi-Screw System without Filters: A single auger takes care of squeezing and filtering the ingredients, eliminating the need for interchangeable filters. This allows you to prepare not only juices, but also smoothies, sorbets and plant-based milks.
- Optimal Capacity: Each full load produces approximately 250 ml of juice, and the extractor can work up to 20 consecutive minutes, allowing you to obtain several liters of juice in a single session.
- Reverse Rotation Function: Perfect for unblocking tough ingredients or maximizing juice extraction.

Intelligent Design and Safety:

- Detachable Power Cord: For easy and neat storage.
- Quick and Easy Assembly: The optimized design requires only three components to be disassembled, making it easy to clean with hot water and without effort.
- Advanced Safety System: The juicer automatically stops if the lid is opened during operation and restarts as soon as it is closed.

Superior Performance:

- Whole Fruit Juicing: The container is designed to accommodate large pieces or whole fruit, minimizing prep work.
- Quiet Operation: With a noise level of less than 45 dB, the H310A is extremely quiet, ideal for use at any time of the day without disturbing others.

Safe and Durable Materials:

- Ultem Screw: A high-performance thermoplastic, also used in the aerospace industry, that guarantees durability and resistance.
- Tritan Components: Both the container and the carafe are made of Tritan, a durable, BPA-free material that is safe for your health.

Commitment to Quality:

With over 40 years of juicer innovation, Hurom continues to deliver the highest quality and durability. The H310A motor is backed by an exceptional 10-year warranty, a testament to the product's reliability and high performance.

COMPONENTS

- Engine body

SOLUZIONI FOODSERVICE

- Juice jug
- Pestle
- Cleaning brush
- Recipe book and instruction manual
- Upper system
- Multi-Screw
- Pitcher
- Power cord
