SOLUZIONI FOODSERVICE

Compact, precise, connected.

The testo 174 T BT is the mini temperature data logger designed for those who work in environments where precision and reliability are essential: food, pharmaceutical and sensitive storage environments. Thanks to the Bluetooth® connection and the free testo Smart App, you can configure it and read the data directly at the measuring point, even up to 30 metres away.

MAIN FEATURES:

- Precise temperature measurement from -30°C to +70°C
- Bluetooth® connection for remote reading and analysis
- Free Smart Text App with reporting and export functions
- Simple and immediate analysis directly at the measuring point
- Automatic data backup even in case of low battery or during replacement
- Ideal for HACCP environments, refrigerated transport, laboratories and pharmaceutical warehouses

SMART MANAGEMENT WITH THE TESTO SMART APP:

- Quick and intuitive setup
- Automatic generation of measurement protocols
- Data export in a few clicks
- Clear display of recorded values

PACKAGE CONTENTS:

- Mini data logger testo 174 T BT (white)
- Wall mount
- 2 CR2032 batteries
- Test certificate

Simple to use, essential for your food or pharmaceutical safety.

Check the temperature wherever you are, directly from your smartphone – with Testo reliability and precision.

* The new Testo 174 T works via a license with the new cloud system <https://www.food.saveris.net/authenticate/> this license costs 20 euros and lasts 12 months from activation for each datalogger.
