SOLUZIONI FOODSERVICE

Store better, longer and in complete safety with the Araven GastroNorm GN 1/2 10-litre airtight container. Thanks to its new design with double-sealed lid, it is the ideal choice for professional kitchens that require maximum efficiency, hygiene and practicality.

- Maximum hermeticity

The double-lip seal on the lid ensures a perfect airtight seal, preventing leaks and contamination.

- Fresh food for longer

The air extraction channel reduces oxidation, extending food preservation by up to 25% (study by the University of Zaragoza).

- Intelligent design

- Integrated handle for quick and easy opening.

- Graduated scale and measuring rod for precise control of contents.

- Rewritable IML label for quick and secure traceability.

- Color coding

Supplied with 7 ColorClips to easily differentiate foods, areas or days of the week: a plus for organization and food safety in the kitchen.

- High resistance

- Made of polypropylene, a sturdy, hygienic and durable material.

- Resists from -40 °C to +95 °C: ideal for freezer, fridge, dishwasher and microwave.

- Flexible LDPE lid for a perfect seal every time.

- GastroNorm Standard

Compatible with all GN equipment (ovens, trolleys, refrigerated counters), according to EN 631.1.

- Food safety guaranteed

Complies with all European regulations on materials intended to come into contact with food.
